

MACROINVERTEBRATE SAMPLING

Volunteer with us!
May 7 | 1:00 PM | River Access Point in Lawrence

You don't have to get into the water or have any experience to join in the fun! Just dress for the weather and walking in forested terrain.

There are three ways to help:

- a "Collector" and wear waders to go into the water to collect insects with nets
- a "Runner" that stays bank side and take nets and buckets from the "Collectors"
- a "Picker" who picks out any insects that are found in the river/stream and places them into a jar for later identification.

Waders, equipment, and beverages provided. For questions or to sign-up, contact CISMA Coordinator Alex Florian at invasivesed@VanBurenCD.org or call 269-633-9044.
